REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The examiner has reviewed the remarks in the response filed 08/03 and found them to be persuasive. In particular, the prior art fails to teach or suggest a polymeric coating applied to an outer surface of a fiber having the residual stress properties set forth in claim 1 because "The stress relaxation behavior of a polymeric material is not strictly a function of modulus, and can vary significantly over materials with different moduli" (response, page 9) thus, a prior art coating meeting the limitations of the other claims can not be considered to inherently possess the stress relaxation properties of claim 1. Claims 15,18 and 24 contain the allowable subject matter of claim 1, and are therefore also allowable.

Drawings

The examiner has reviewed the drawings and found some minor informalities, i.e. handwritten figure and reference numerals, and thus formal drawings are required in response to this office communication.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
